# DATAOPS SERVICES

WYNTEC

Timely, accurate and *actionable* information is quite simply the "life blood" of every enterprise, yet most organizations face one or more ubiquitous challenges:

1. Competent data management (DM) resources are becoming extremely difficult to hire and retain. Additionally, DM is not a core competency for most organizations
2. A sound data pipeline is essential for digital transformation initiatives, though most organizations currently have archaic, costly, or redundant platforms with suspect data quality
3. "Easy button" solutions offered by many vendors often fail to satisfy client needs

Wyntec's DataOps services are designed to tackle each of these challenges

1. We provide a right-sized team of highly skilled resources tailored to your specific needs. Our engagements are priced using a **delivery-based** model rather than an unpredictable time and materials approach that is often prone to cost overruns. You don't pay until we deliver.
2. Our team has decades of experience designing, building, and maintaining a wide variety of Data Pipeline solutions leveraging our pre-built data models and our totally unique data acquisition platform
3. Wyntec isn't in the business of simply ingesting data and charging exorbitant fees to make it useful. We craft an end-to-end solution that can be incrementally implemented to best meet your business needs.

People
•Subject Matter and Techology Experts

Processes
•Proven Information Management methodologies

Technology
(A2B Data™)
•Best of breed platform for *lightning fast, lower cost* data acquisition

What tangible benefits would your organization realize if it could:

- *Spend more time analyzing information rather than acquiring and transforming data*

- *Deploy vital information assets in weeks rather than months*

- *Take the resource cost and scarcity issue off the table*

About Wyntec, LLC

- Established in 1997 with a focus entirely on DataOps services
- Developed A2B Data™ platform to revolutionize data provisioning
- Pioneered a unique staffing model to provide the right resources at the right time
