# INTEGRATION PLATFORM MODERNIZATION SERVICES

WYNTEC

Wyntec offers a proven, revolutionary solution that allows you to lift, modernize, and shift your data integration platform while also enabling self-service capabilities that will lower your costs and improve stakeholder satisfaction

Your Data Integration Platform → Metadata "Crawl" → A2B DATA →

- Information Governance
- Data Provisioning
- Lift, Modernize and Shift

- Automatically extract the business, technical, and operational metadata that is captured in your current Data Integration platform and load it into Wyntec's secure Information Governance Services platform where it can be mined for invaluable insights
- Move your server-based Extraction, Transformation, and Load (ETL) code to a self-service SQL-based transformation platform that truly leverages today's modernized platforms (on-cloud, on-premise, and hybrid-cloud)
- Implement self-service capabilities to reduce your reliance on increasingly costly and scarce ETL developers
- Eliminate expensive Data Integration licenses and move to a subscription-based and usage-based pricing model that scales to your budget.

About Wyntec, LLC

- Established in 1997 with a focus entirely on DataOps services
- Developed A2B Data™ platform to revolutionize data provisioning
- Pioneered a unique staffing model to provide the right resources at the right time

What tangible benefits would your organization realize if it could:

- *Extend the life of your data integration platform without having to rehaul every component*
- *Reduce expensive overhead and licensing costs*
- *Improve the velocity of your development process and foster greater stakeholder satisfaction*
